

**B.E / DIPLOMA (E.C. / I.C. / ELE.) FINAL YEAR  
READY MADE PROJECTS**

1. Home automation and security system.
2. IR Remote controller for controlling Home appliances.
3. RTC based alarm clock with 8-alarm setting per day with LCD display and buzzer indicator.
4. Programmable sequential timer with 10 outputs with LCD display and time setting by key.
5. Data acquisition system with LCD display with RS-232 Interface.
6. Speed control of stepper motor with LCD/7-segment display.
7. AC voltage regulator with 7-segment display by using TRIAC.
8. 4-way traffic light controller with 7-segment display.
9. Microcontroller based door locking system.
10. Line voltage and Line frequency measurement with LCD/7-segment.
11. Automatic Railway Gate Controller.
12. Microcontroller based visitor counter.
13. Microcontroller based water level controller.
14. Time based automatic college bell using microcontroller.
15. Time operated Electrical appliance controlling system and many others.

**Note:** We also provide customize projects.
